Broadest Offerings of Week Cause General Recession In Quoted Values

NEW YORK, Oct. 27.—United States Steel was the outstanding feature at the opening of today's stock market, a block of 2,500 shares changing hands at prices down to 38 1/2. This was attributed to disappointment by speculative interests at the failure of the steel directors to declare an extra dividend, and the common stock. The steel stock was slightly lower, but oil, shipping, sugar, and utilities were higher by fractions to a point. Exchange on London was firm, probably in anticipation of favorable advances later in the day regarding industrial conditions.

The market became distinctly unsettled during the morning, virtually the entire list yielding to the broadest offerings of the week. Steel was especially vulnerable, reacting 1 to 1 1/2 points, and equipment, motor oil, chemical and paper shares eased 1 to 2 points. Tobacco and rubber issues joined the recession and also investment rails; the latter, however, in moderate degree. Among junior rails, Wisconsin Central was conspicuous for its 5 points loss. The 2 per cent opening rate for call money contributed to the market's dullness but the rate for British exchange continued to strengthen.

Selling pressure relaxed at midday, when irregular recoveries were led by steel, oil and equipment, but a visible rallyed two points and Mexican Petroleum and Texas and Pacific call was one point higher. Elsewhere the recovery was confined to fractions.
